EVALUACION GENETICA NACIONAL RAZA HOLANDO
EVALUACION GENETICA INTERBULL
Agosto 2015

La presente edición de la Evaluación Genética Nacional de Ganado Holando incorpora los resultados generados por la evaluación genética internacional realizada por Interbull.

SECCIONES: Esta comunicación esta compuesta por tres grupos de padres evaluados.

La **Sección 1** presenta padres evaluados por características de producción y tipo, nacidos **a partir del año 1995**

La **Sección 2** presenta padres evaluados solamente por características de producción, nacidos **a partir del año 1995**.

La **Sección 3** presenta padres evaluados nacidos **antes del año 1995.** Los padres evaluados por producción y tipo se encuentran en la sección 3a y los padres evaluados solo por producción en la sección 3b.

Para que la información de un padre sea publicada en cualquiera de las secciones deberá contar con una Repetibilidad mínima de 0,6 y tener al menos 10 hijas en 3 o más rodeos. Cuando corresponda –toros publicados con hijas evaluadas en al menos 10 rodeos– se incluirán los resultados de la evaluación genética internacional, aportados por Interbull, indicándolos con la letra M.

Los valores genéticos para las características de producción están expresados en **Diferencia Esperada en la Progenie (DEP),** que equivale a la mitad del valor de cría del animal. Las unidades utilizadas son kilogramos para la producción de leche y kilogramos y porcentaje para los componentes grasa y proteína. Se incluye el resultado del **Indice Económico Productivo** (IEP) expresados en base 100.

Los valores genéticos para las características de tipo se expresan en **Valor Genético Estandarizado (VGE)**, el cual indica cuantos desvíos estándares se desvía de la media de dicha características el valor genético del animal.

La base genética considerada es el valor genético promedio para cada característica de las hembras nacidas en el **año 2010** cuyo registro ha sido considerado para esta edición de la evaluación.

ABREVIATURAS UTILIZADAS:

DEP: Diferencia Esperada en la Progenie REP: Repetibilidad

PER: Percentil

HIJ / ROD o H/R: No. de hijas / No. de rodeos que presentan evaluación en Uruguay.

VGE: Valor Genético Estandarizado para rasgos de tipo.

IEP: Índice económico productivo.

M: MACE: por sus siglas en inglés para Multiple Across-Country Evaluation. Se presentan hijas, rodeos y países por los que fue evaluado en el mundo.
